FOREWORD

Important to Read:

The Chicago House Wrecking Company is the only concern selling materials to practically complete buildings, direct to the consumer or contractor at a great saving in price.

ORDERING material of this class is a very simple matter through our system, and our facilities for furnishing this material are practically unlimited. Think of being able to get the material for house or barn through one firm, through one source and under an iron clad guarantee and know that everything has been worked out to a nicety as regards the material in general, the design, style, and quality harmonizing.

If you have built before you must certainly realize what a wonderful convenience it will be to you to be able to get all your material not only through one source, but at a great saving in price, as compared against the necessity of purchasing same "piece meal" from the many different sources that you may have been compelled to do in your previous operations. We ask you to read carefully our Free Plan offer telling you how you can secure the Plans free and our General Specifications, which tell you all about the material, and by all means avail yourself of our very liberal offer regarding Plans, Material List and Specifications. By doing this everything will be so simple and clear in your mind that you can readily appreciate it all.

In preparing this edition of our Plan Book, our aim has been to produce designs to meet the requirements of all conditions and localities and to approach near enough to individual tastes so that any changes suggested by individual preferences may be made in any of these plans without destroying their distinctive features. We have cut loose from all the old and wasteful methods and ideas of design and building construction and present many entirely new features never before attempted in houses of moderate cost.

Believing that mere size is not an indispensable item as regards comfortable and convenient arrangement of the interior, we have developed our designs along modern lines, sensible and economical, and present them to a wise buying public with the full confidence that they possess many convenient features, uniform and harmonious effects. In this collection will be found not only comfortable and convenient homes at exceptionally low prices, but also designs that are a profitable investment. They will easily rent at a monthly return that will net a large dividend, or may be readily sold at a good profit above cost, as with our system all costs are reduced to the lowest minimum.

The advantage of buying all the material necessary for the construction of a building from one source is apparent to all, but in buying from this Company there is a further advantage in the fact that we make a study of furnishing materials that will build the house to the best possible advantage and at the lowest cost, not only considering the cost of material, but the cost of construction as well.

Our position in the market enables us to buy at a figure impossible to others, and to sell at prices lower than the material costs many regular dealers. The dealer then must add his tremendous profits. There are many further advantages in buying from us because, customers not only get the material that goes into the construction of a design from one source, but they know that everything has been selected to harmonize and to give the best results.

No firm in the country is as well equipped to supply the demand for building material of all kinds as we are. We have many opportunities of buying materials at reduced prices, for we buy at Sheriffs', Receivers', Manufacturers' and Assignees' Sales, whether the amount is a thousand dollars or a hundred thousand and take advantage of all these opportunities which enables us to give our customers the benefit of the low prices arising therefrom.

We can furnish you with anything that is necessary for the construction of your house, not only lumber, hardware, sash, doors and millwork, but can furnish you with your plumbing outfits and with either hot air, hot water or steam heating plants and also the innumerable accessories that are necessary to a house, not forgetting our complete line of furniture, rugs and carpets, all in brand new, bright and clean stock.

Our regular catalog, showing our complete line of material with full description and prices, will be sent to you on application. Perhaps you have this catalog now, and if it is not our latest edition, we trust that you will send for it. It is necessary that every buyer should have this catalog and be well posted in the different lines of material which we have listed in it. We are always making improvements in our House designs. We do not stand still. We are continually moving forward and are able to give you some of the newest and latest features in the construction line.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

A HOME

Is Within Your Reach No Matter How Limited Your Income.

THE object of this "Book of Plans" is to enable you to purchase with the greatest economy all the material to build any home or design illustrated. The Chicago House Wrecking Company, originators of all new building ideas, comes to you with the most perfect home-building proposition ever before presented.

We propose to furnish you first-class, brand new, high-grade building material of standard manufacture and grading, accompanied by valuable Blue-Print Plans, Specifications and Material List, to construct complete any of the designs shown in this book.

By our up-to-date building proposition you can buy a home at just about fifty cents on the dollar, compared to the usual procedure. You eliminate all middlemen's profits. There is no uncertainty as to what you are going to get. You can dispense with the necessity of having plans drawn by architects. We come to you with a finished proposition, all laid out carefully along thoroughly practical, modern and economical lines. There is every reason why by our wholesale method we can give you a better home-building proposition than your local market affords. Our business extends from the Atlantic to the Pacific and from the Gulf of Mexico to Canada. In other words, the ideas brought forth in this book are the result of the combined demands of the home-building public of this great territory, and we can say, without fear of contradiction, that our proposition and our plans, as a whole, are the best.

Contrary to our name, however, we do not wreck houses; we have outgrown this many years ago, and handle little or no second-hand material except in the machinery and kindred lines. In connection with our great general merchandise establishment, we have one of the largest lumber yards right in the heart of Chicago, and immense warehouses where all better stocks are constantly under cover.

The Chicago House Wrecking Company was organized in 1893, since which time it has sold millions of dollars' worth of merchandise throughout the world, and our name is known broadcast. Our capital stock and surplus is over \$1,000,000, and as to our standing in the commercial world, we refer you to any bank or banker, any express company, publishers, mercantile agencies, or you can write direct to our depository, the Drovers Deposit National Bank of Chicago.

But we can give you something that will come nearer being the "proof of the pudding" and that is copies of commendatory letters we are constantly receiving from customers who have purchased our material and saved big money, and quite likely there will be among them some from your vicinity.

Our guarantee is of a broad and binding character. We positively guarantee that every dollar's worth of merchandise purchased from us, whether it be a complete house bill or a single item, will be exactly as represented. Should anything prove to the contrary, we will make good. By this we mean, we will either take back the merchandise, pay freight on same, refund you the price paid us for it, or adjust matters honorably and satisfactorily. With this positive guarantee before you, there is no chance of making a mistake in buying from us. We want satisfied customers. We have learned the virtue of advertising of this character and we are anxious to make a satisfied customer of you.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR FREE PLAN OFFER

By this extraordinary offer you can secure, free of charge, all the assistance you need for the proper and economical construction of your house or barn.

We save you from 25 to 50 per cent on your completed building and give you free of charge, a set of Blue Print Plans, Specifications and an itemized List of Material, together with any information you may need for the completion of your building.

OUR PLANS

Our Plans are drawn by experienced Architects, men who have been on the job, and know what they are about. They are not "picture house" plans, such as are offered on the market at from 10 to 15 times the price we ask for ours, and are sold merely for the purpose of selling the plans, regardless of how they will work out, or whether the customer will save money in his building. Our Plans, Material List and Specifications, if procured from an Architect of any reasonable standing, could positively not be obtained for less than \$25.00 to \$100.00 per set, and our price is only \$2.00, with \$1.50 refund, as specified below, if they do not suit, so the most you could lose would be the small sum of 50 cents, which hardly covers cost of carriage. Our designs are all practical, up-to-date, modern, constructed with a view to proper strength, beauty, utility as well as economy and ease of construction.

OUR BLUE PRINT PLANS CONSIST OF THE FOLLOWING:

- | | |
|--------------------------|--------------------------|
| 1. Basement Plan. | 5. Right Side Elevation. |
| 2. First Floor Plan. | 6. Left Side Elevation. |
| 3. Second Floor Plan. | 7. Rear Elevation. |
| 4. Front Elevation Plan. | 8. Detail Sheets. |

All drawn correctly to scale $\frac{1}{4}$ to 1 foot, unless otherwise shown.

MATERIAL LIST

Our list of material is complete in detailing all the items needed and the purpose for which they are intended. By the use of this List in connection with our Catalog, Plans, Detail Sheet, and Specifications the whole matter will at once become clear to anyone the least bit familiar with the work in hand, and you will see all matters simplified to a minimum.

ACCURACY

Our guarantee that we will positively agree to furnish sufficient material to erect the building according to Plans and Specifications, etc., is backed by our enormous capital and our unassailed reputation and you can readily understand it is of the utmost importance to us, as well as to yourself, to see the material lists are correct, and our Plans strictly accurate, and that sufficient material is allowed in every instance.

PRICES

The prices quoted in this book are approximate and based on prevailing market conditions. They are intended mainly to enable you to form some conclusion as to costs.

DELIVERED PRICES

All quotations in this book are made net cash F. O. B. Cars Chicago. After looking carefully over this Book of Designs, select one or more that pleases you and write us. We will name you prices DELIVERED F. O. B. CARS YOUR STATION, safe delivery guaranteed of every item, and everything to be shipped free of all freight charges. You will know exactly what the material costs you laid down at your station and there will be no guess work about it. After receiving our delivered price and you determine which design you want, then it is time for you to get a set of Blue Print Plans, Specifications and Material List so that you can see just what the house is and what you get for the price made you. We send you set of these Plans, Specifications and Material List, as described above, transportation prepaid, for the very low price of \$2.00, but this is only as a deposit and guarantee of good faith and as a protection to us. You can readily see the \$2.00 cannot begin to cover the cost of plans, and we could not afford to do this if we did not expect to sell you your house or barn.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR FREE PLAN OFFER

If after you have seen and looked over your Plans carefully, finding them satisfactory, which we are sure you will, as they are thoroughly practical and reliable, and you send us an order for the Design, we credit you on your bill with the \$2.00 you have advanced us, and the plans thus become your property absolutely free of charge.

If, however, for any reason you decide not to use the Plans, Specifications and Material List, and return them to us in good order within 20 days, by first class postage, properly marked so we can identify where they are from, we will refund you \$1.50, thus making the information costing you only 50 cents, which you can readily understand does not begin to pay us for the labor, but is merely a protection to us against thousands of people who would send for Plans out of mere idle curiosity.

QUALITY OF MATERIAL

All the material used in our House Designs is BRAND NEW, guaranteed fully up to the grade, specified, of clean, fresh, and bright stock. Our millwork and hardware is the latest, newest designs, the patterns of everything in general being uniform and consistent, keeping in class with the design it applies to, and only such material that would be furnished by any reliable contractor who had his customers' interests at heart.

By referring to our "Material Specifications" on following pages you will be able to get a good and practical idea of the kind and quality of the material we furnish. In all cases, however, the Material List accompanying Plans and Specifications for each respective design, governs, as it is not practical to make one general Specification to cover the great number of designs we present herein.

CHANGES FROM PLANS

Such changes as moving a partition back or forward, or a door and window, or a slight change in stairway, can easily be made by your carpenter, and seldom makes a change in the Bill of Material or in the cost of the building's construction. If changes of a more serious nature are required, it will be advisable for you to send for a set of our Plans as they are, as per our liberal offer—study them carefully—and perhaps you will not want the changes at all. If you do, however, you can mark such changes on the Blue Print Sheets and return the sheet and your instructions to us by first class mail. Be sure and enclose them in one envelope. **Do not send plans and letter separate,** it will save you much time and possibly avoid the loss of one or the other. With this information in our possession we will be able to figure the changes you desire and name you a price on total cost of design.

CHANGES IN MATERIAL

After you have carefully looked over our List of Material and find that you wish some changes made in the quality of the material, either cutting down or increasing the expense—for instance, such as oak finish, floor or stairway, style of windows or doors—tell us about it. We will be glad to make you full allowance for what you cut out, and name you very low prices for any material you may wish to add.

REVERSE PLANS

We can furnish Reverse Plans for any of the designs shown. A Reversed Plan means that the rooms will be just opposite from the way they are shown. This, however, will necessitate the customer getting two sets of plans, one same as the original in the book, and one reversed. The printing on the reverse will be backwards, therefore, requires two sets. For this it is necessary to make an additional charge of \$1.00, making a total charge of \$3.00 for the two sets. Refund will be made only on the regular plans.

PLANS TO ORDER

We employ a staff of competent and experienced Architects, Designers and Estimators, and at any time can figure with you for drawing of complete Plans, estimates and Material List, for any idea or design of your own you may wish to submit.

Write us for special terms on this class of work. If you purchase your material from us, we will make such liberal allowance as is consistent.

REASON FOR OUR LOW PRICES

There are many reasons why we can undersell our competitors. In the first place, we cut out all middlemen's profits on the various items and give our customers the benefit of these savings. We purchase much of our material at special sales under most favorable conditions. We have every facility for handling orders in the best possible dispatch and with the least possible expense.

We are satisfied with small profits depending upon our large sales and this accounts for our acknowledged success. We have received orders for House Designs from Maine to New Mexico, and from Texas to Minnesota. We have thousands of testimonials from satisfied customers and see no reason why we cannot make one of you.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

GENERAL MATERIAL SPECIFICATIONS

OF
MATERIAL FURNISHED FOR OUR DESIGNS
ALL BRAND NEW MATERIAL

GIRDERS AND BEAMS: All girders and beams, posts, etc., as shown on plans and called for by the List of Material, will be furnished of a No. 1 grade Southern Pine, square edge and sound, and of correct dimensions according to their requirements.

JOISTS, RAFTERS, STUDDING, ETC.: The necessary quantity of studding, joists, rafters, bridging, etc., are furnished in Southern Pine, in the correct lengths to work most economically and satisfactorily, and in the sizes to insure proper equalization of strength and symmetry, all to be square edge and sound material, entirely suitable for the purpose intended.

SHEATHING: For the roof, siding and floors we furnish square edge Southern Pine sheathing of a suitable grade, standard lengths and widths. Roof sheathing to lay with a spacing for shingles unless patent roofing is specified. Sub-flooring to be sufficient quantity to cover all floors as specified in the Material List, and plans as well as box sheathing for the entire outside of the house.

SHINGLES: To be Washington Red Cedar shingles, Extra Star A Star quality, or White Cedar shingles of the same value if desired by the customer, unless patent roofing is specified. The quantity we furnish being sufficient to lay them $4\frac{1}{2}$ " to the weather.

LATH: For the lath we furnish Regular Minnesota No. 1 Soft Pine lath, 32" or 48" long.

SIDING: For siding we furnish Beveled siding; (also known as Weatherboarding or Lap Siding), $\frac{1}{2}$ x6, in either clear Oregon Spruce, "B" Red Cedar, or "C" White Pine, Clear Cypress or Poplar, unless specified to the contrary in our Bill of Material.

FLOORING: For flooring we furnish Clear Georgia Pine finished flooring, for first and second floor, unless specified to the contrary on our Material List. For porch flooring we furnish good quality of White Pine porch flooring or Fir, or Cypress, as Material List may specify.

EXTERIOR FINISH: We furnish all corner boards, all base boards, cornice boards and other exterior finish in Select No. 1 White Pine stock. Porch ceiling and cornice soffits in $\frac{5}{8}$ " thickness Southern Pine, Matched and Beaded Stock.

MILLWORK

FRAMES: We furnish all window frames of sound, clear stock, $1\frac{1}{8}$ x $4\frac{1}{2}$ outside casings, and $\frac{7}{8}$ -inch pulley stiles, plowed and bored ready for pulleys. Door frames with $1\frac{1}{8}$ x $4\frac{1}{2}$ inch outside casings, $1\frac{3}{8}$ inch rabbitted jambs, with hardwood sill. The basement door and sash frames to be plank frames, door frame made from 2x8 stock, and sash frames from 2x6 stock. All frames to be made up, window frames to be fitted complete with pockets and pulleys, but will be shipped knocked down.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

PORCHES, ETC.: The Columns of the Porches to be as shown on plans, either solid Turned Column, or built up Doric Column. All porches to be furnished with or without ballustrade, as shown on plans. We furnish all crown, bed, neck, cove, and nosing mouldings, etc., that are required, all to be of patterns and numbers as shown and specified in Material List.

DOORS AND SASH: All windows figured for our plans are $1\frac{3}{8}$ inches thick, check rail and glazed as specified in List of Material, with either single or double strength clear glass, or plate or leaded glass if specified. All sash stock is strictly clear and primed in oil. All inside doors $1\frac{3}{8}$ inches thick, sizes and styles marked on plans and specified in the List of Material. The outside front door and rear door to be glazed and of the size and style as specified in list and of $1\frac{3}{4}$ " thickness, unless otherwise shown on Material List.

INTERIOR TRIM: Material for this work to be Clear Georgia Pine, unless specified to the contrary, including all door and window casing, baseboard, carpet strips, (door jambs are cut to size and ready to put together) base blocks, cap moulding, door and window stops, chair rail, picture moulding, etc., except thresholds, which will be furnished in clear Oak. All the foregoing material is entirely suitable for natural wood finish, or any of the many beautiful stain effects now so deservedly popular. Illustrations of our patterns as shown in Catalogue are detailed full size on sheet with Blue Print Plans.

STAIRS: We will furnish newels, angle newels, rails, balusters, etc., all finished and sanded ready to be put up. For the carriages, fascia boards, wall strings, treads and risers, we will furnish the necessary lumber in the required thickness and widths in sufficient quantity to complete the stairs.

HARDWARE: We furnish all mortise front door and inside door locks of appropriate design; all door butts, sash lifts and fasteners to match. The numbers given are shown in our Catalogue with full description. We also furnish the necessary sliding door hangers, sash weights, cords, pulleys, base knobs, coat and hat hooks, and common and finishing nails, etc., for the completion of the entire job.

BUILDING PAPER: We furnish sufficient building paper to cover the entire sides of the building all four sides.

GALVANIZED IRON: Under this branch of building work we furnish all the necessary down spouting, guttering with necessary fittings, flashings, tin shingles, etc., and all in the best galvanized iron, and every item as specified in our List of Material.

RECAPITULATION

The above will give you a convincing and sufficient general idea of the high class of material we furnish, and you will note that it is practically everything necessary to build the house, including all lumber, millwork, sash doors, glass, hardware, nails, guttering, spouting, etc., that is necessary for its construction from the foundation up, excepting masonry work and painting.

SPECIAL QUOTATIONS

We are prepared to furnish with any of our designs either Hot Water, Steam, or Hot Air, Heating Plants. Complete Bath and Kitchen plumbing outfit, together with the necessary roughing in pipes; and also with all piping and fittings necessary to install gas. These approximate prices on Plumbing, Heating, Paint, etc., are shown in this book of plans.

By referring to our general catalogue you will see illustrated and priced, our extensive line of mantels, consoles and grates, as our prices do not include these, nor china closets, sideboards, or any such furnishings. These items will be furnished to suit individual tastes and requirements at the very lowest possible price.

We can also supply you with the necessary amount of high-grade paint and oil finish for any of our designs, with the proper assortment and quantity of colors.

We do not furnish any masonry materials such as Brick, Lime, Cement or Plaster, as the freight on these items is generally too high to allow us to ship them at a saving to our customers.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

HOUSE DESIGN No. 6

SIZE, 23'6" x 33' 0"
EXCLUSIVE OF PORCHES

APPROXIMATE PRICE, \$650.00
(SUBJECT TO MARKET CHANGES)
Write for Actual Delivered Prices

7 ROOMS AND BATH

HOUSE Design No. 6 is known practically from one end of the United States to the other although it has not been on the market for more than six or eight months. It is positively the most popular design ever placed on the market. The extreme low price of \$650.00 at which we originally offered it to the public was made when material, both as regards lumber and mill work, was considerably lower than at the present time and we have since added quite a few improvements that would ordinarily increase the price of this house considerably, but on account of the large amount of advertising the design has been given, the large number of orders received for it, we are still furnishing the material for it at the same low price.

No. 6 has been purchased by customers from all sections of the U. S. to which it can be shipped profitably and has given universal satisfaction. On the opposite page we give you a general description and also the necessary floor plans.

We can also furnish this design, which is our No. 16, in a larger size, being 2 ft. longer, 2 ft. wider and 1½ ft. higher for \$98.50 additional to the above price.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

HOUSE DESIGN No. 6—Cont'd

HOUSE Design No. 6 is an ideal house for a corner lot but with its excellent lay-out it is equally desirable regardless whether it is placed on a corner or not. The plan in general is laid out with a view to beauty, economy and utility.

You enter the reception hall which is well lighted and embellished with a handsome stairway to the second floor. A large cased opening to this room from the parlor is another beautiful feature and entering the parlor we have two bay windows, not generally obtained without considerable expense. From the parlor we pass through another cased opening into the dining room. This is the most attractive room, the wall space being unbroken and lighted by a double window which gives ample light. In addition, we have placed a handsome casement sash in the rear wall, glazed with leaded crystal sheet glass, which adds much to the general beauty of the interior. The dining room is connected conveniently with the kitchen and pantry. From the pantry we have a stairway to the basement and from the kitchen an exit to the rear porch. This entire lower floor is laid out to save the house-keeper many useless steps, which are generally necessary in homes built on poorly worked out plans.

From the main stairway in the reception hall, we get up-stairs landing in a hallway from which direct access can be had to the three bed rooms and small room at the rear which may be arranged for either bed room or bath room. The entire house is exceptionally well lighted and ventilated. The two main bed rooms have large closets and if additional closet space is needed it is an easy matter to place one in the bath room and one in the small front chamber.

This design affords an opportunity of heating with either hot water, steam or stove heat in the most economical and convenient manner. The arrangement of rooms and exposure is a matter which should be carefully considered. House No. 6 has been built in the city, suburb and country hundreds of times, being arranged for the various conveniences at hand at the respective locations.

The exterior of this house presents an exceptionally pleasing and beautiful appearance to the eye. It will decorate any location and fit in with any surrounding. If built in the city, it will be found most agreeable as a city home, and when built in the country, with all the beauty of natural scenery, landscape and plenty of ground space, one can easily appreciate its beautiful appearance. Our plans for this house, like all our other houses, are very complete and with the aid of our material list, which shows what we propose to furnish for every item going into its construction, giving our catalog number and detail, anyone can see at a glance the excellent quality of material we furnish and when our plans are used, together with our specifications and material list, an ordinary carpenter will understand them perfectly and will be able to pursue the construction of this house to completion in a most satisfactory manner.

Read carefully our Free Plan offer, also our Material Specifications as outlined on the preceding pages of this book.

Don't forget that this house can be equipped most economically with either hot air, hot water or steam heating plants and also bathroom outfit. We are pleased to quote the following special low prices on the material necessary to install Bath Room Outfit No. 3½, complete as listed and described in our catalog together with one No. K-39 cast iron white porcelain enamel kitchen sink, one 30-gallon iron range boiler complete with stand tube and couplings for iron pipe and also including all the necessary roughing-in material to install these fixtures in a first-class workmanlike manner above the ground line with full instructions and blue prints showing the installation of same, for the very low price of.....**\$92.50**

This is for strictly "A" grade material:

7 ROOMS AND BATH

WE have here a design of house on the bungalow type, having reception hall, living room, dining room, kitchen and pantry on the first floor, with three ample sized chambers and alcove chamber as well as bath and spacious closet on the second floor.

Front entrance is made directly into the reception hall, having direct passage through the house to kitchen. Immediately adjoining the reception hall, we have the living room, separated only by a cased opening; thus the two compartments are practically both thrown into one large living room.

The stairway is an open stairway to landing, and in this exceptionally neat arrangement, we have designed a seat immediately below the staircase, conforming to the general outline of this design. Dining room is arranged with seat in the bay, having three French leaded glass above; also leaded glass window on side so as to give a beautiful interior effect.

The stairs land on the second floor, practically in the center of the house, making access to all rooms and bath convenient and close at hand.

All the material for this unusually neat house is of the best quality and all interior finish and floors clear stock. We can furnish a Colonnade to fit in the cased opening between the hall and living room if desired at a small additional cost.

The design is also well arranged as regards plumbing and heating fixtures, and all in all, we have made a careful study to place this house on the market as something entirely new and out of the ordinary and have it appeal to persons of good taste, who wish to build economically and get the very best possible results.

The exterior of the design is strictly classic, made to conform to the "Old English" style of architecture in every particular, having shutters for all windows in front and side lights on the door.

Our bill of material will call for shingles for this particular design. However, we can also furnish it with the upper half in shingles and the lower half in siding, or vice versa at the same prices.

Do not forget to read our Free Plan offer as outlined, and our Material Specification section which will give you full information relative to the excellent quality of all the material we furnish for this house.

A Complete Plumbing Outfit such as is illustrated on the back page cover of this book with all material necessary for "roughing in" work so as to complete the entire job to the ground line—all material "A" grade and guaranteed for.....\$110.00

7 ROOMS AND BATH

IN our Design No. 133, 24 ft. by 29 ft. 6 in. in size, we present a combination of country and city home. The distinguishing feature of this design is the large veranda extending across the front and along the side of the house. This feature appeals strongly to those who are fond of out-door life. In interior arrangements, this design has all the comforts of a modern home. Our chief aim has been to utilize every inch of available space to the best possible advantage, without unduly increasing the cost, and we believe we have succeeded. Though the house is of moderate size, the rooms are all comfortably large. There is no waste of room where not needed.

The main stairway is modern in design and construction and adds much to the general attractiveness of the interior. The large cased openings connecting the hall, living room and dining room, lend additional roominess to the already comfortable dimensions. The pantry is so placed as to be easy of access from both the kitchen and dining room. There are three chambers on the second floor, each provided with a closet, and opening directly into the center hall, with a linen closet also opening from the latter. The hall is lighted by a large window on the stairs and may be readily ventilated. There are no dark corners anywhere. The windows are large and placed to insure perfect light and ventilation and yet leave plenty of space for furniture.

Although our "Material Specifications" outline fully the general class of material that we furnish on all of our designs, the material list covering the above design will show exceptionally good qualities, in every way suitable and desirable for a first class job and will be an agreeable surprise for intending purchasers.

Our Free Plan Offer in the preceding pages describes fully how you can secure a set of plans, specifications and list of material Free of Charge. It will be well to read this interesting offer carefully.

8 ROOMS AND BATH

THIS house is one of the most popular designs ever built. It pleases a large number of people and is a design that can be most economically constructed. It has eight rooms and bath, with pantry, vestibule entrance and large hall; the hall communicating directly with kitchen, parlor and dining room. Note carefully the four good-sized, well-ventilated bed rooms with bath on the second floor conveniently placed, and the large closets with which all the bedrooms are provided.

It is an ideal house in many respects. Just the thing for a medium-sized family and well suited for country, town or city. This house has been built very often and is extremely popular with the class of people who desire comfort, neatness of design and a generally well laid out house.

This house is susceptible to many changes as regards interior arrangement; frequently with little or no additional cost, and these we will be pleased to figure with customers any time as outlined in our free plan offer.

It is well to remember that the material we furnish for our designs is brand new stock, interior finish is clear, of the best grade. Full information with reference to this is given under the head of "Material Specifications," and anyone who contemplates building this house will do well to take advantage of our Free Plan offer as outlined therein, thus getting information of great value.

8 ROOMS AND BATH

IN the above we illustrate a strictly modern home of moderate size. It is 28 ft. wide x 28 ft. deep with a 7 foot wide porch, extending nearly across the entire front. The large Colonial windows give the house a strikingly distinctive effect often lacking in dwellings of double its cost. The interior has been arranged with a view to comfort and health of its occupants. The windows are many and large, and placed to insure ample light and perfect ventilation. The cellar stairs are directly under the main stairway and within easy access of the kitchen. The pantry communicates directly with both kitchen and dining room; a convenience that will save many steps during the preparation of meals. There is, besides, an extra closet opening from the kitchen that is universally appreciated. The general comfort and roominess of the house is further enhanced by the large cased opening connecting the dining room, living room and hall. Nor has the artistic been neglected. The triple casement window on the stair landing is glazed with leaded crystal glass and provides not only ample light and ventilation but gives the stairway a pleasing artistic effect, and the leaded glass window in the "den" also adds much to the general attractiveness.

The second floor has four good size bedrooms, bath and four closets. All the rooms are well lighted and ventilated and open directly into the hall, insuring complete privacy to the occupant.

The entire material for this house is of exceptionally good quality and in keeping with the character of the design. It is our constant

aim to eliminate waste at every angle, and in drawing the plans and developing the designs we avoid impractical and expensive construction and in making up our bills of material, we utilize standard sizes and grades and so avoid unnecessary expense which always follows impractical and unusual construction. This design, especially, is susceptible to a full development along these lines. As a result we are enabled to offer the material necessary for its construction at a price impossible to others and so make it possible for people in moderate circumstances to secure a beautiful and commodious home at a very low price.

All of the material for these House Designs is strictly Brand New stock of standard manufacture and we guarantee the grades specified in our Bill of Material. With the aid of our complete Blue Print plans and Specifications and our itemized List of Material anyone at all familiar with building construction will have no difficulty in constructing this dwelling. We outline on the preceding page of this book our Free Plan Proposition which you are earnestly requested to read.

8 ROOMS AND BATH

IN this design we have an eight-room house, 25 feet wide by 33 feet deep. This design is drawn on correct lines and its heavy front porch and bungalow style of roof gives it a decidedly distinctive and exclusive effect. The first story is finished with beveled siding with the second story shingled, but this may be changed in any way to suit individual taste. While we bill this house out regularly without any attic material, the joists are heavy enough so that if it is desired to finish up a few rooms in the attic, all that will be required is the flooring and extra studding for that purpose. We call especial attention to the bay windows on the first floor, giving abundance of light and perfect ventilation for the entire interior. The pantry has direct entrance to both kitchen and dining room, and the entrance to the basement stairs is also through the pantry. The large cased openings between dining room, living room and hall gives a clear view to the handsome stairway leading to the second floor. Landing on the second

floor is practically in the center of the house so that no room is wasted with long halls or dark corners. Every room has direct entrance to the hall and there is the further advantage of connecting bedrooms which is very desirable in some cases.

The material we are furnishing for this design, as for all others, is described in general detail under the head of "Material Specifications" to which we call your special attention. We would also like to have you read our Free Plan Proposition as outlined, and urge you to take advantage of this most liberal offer. Our material list furnished with our plans describes fully what we furnish and this list in connection with our catalogue gives complete information of what goes into our designs.

8 ROOMS AND BATH

IN the above we present a design that in roominess, comfort and convenience will meet the requirements of the most exacting. In size it is 30 ft. wide by 30 ft. long, exclusive of the porch. The swell front or bay windows, the handsome dormer and the massive colonial porch give the exterior an exceedingly pleasing and substantial effect. The interior arrangements have been developed to meet the requirements of a modern home. The pantry is placed between the kitchen and dining room, thus saving many unnecessary steps. The stairway to the basement is directly under the front stairway and entry to the kitchen may be made through the front hall without passing through the other rooms. The chimney is so placed as to make heating the house the most economical possible, either by stoves, hot water, furnace or steam heat. The large cased openings between the dining room, living room and hall lend additional roominess to the interior and set off admirably the handsome stairway leading to the second floor. We call special attention to the fact that ascent to the second floor can be made from either front hall or the kitchen in the rear, which is an added convenience generally appreciated.

The landing of the stairway on the second floor is directly in the center of the house with direct entrance to each of the four bedrooms and bath, ensuring complete privacy to its occupants.

It is one of our leading and most popular designs and we are supplying the material necessary for its construction in extra good quality therein.

In this book you will find further information regarding the quality of material, under the head of "Material Specifications," and our Free Plan Proposition is also fully described. If you are interested in this or any of our designs and are looking for a real bargain write us fully.

7 ROOMS AND BATH

BY way of variety and to meet the demands of varying tastes, we present herewith our design No. 136 the size of which is 25 ft. 6 in. wide by 28 ft. 6 in. deep that may at first sight seem out of the ordinary with the wide gables at the front, but the massive porch extending across the front of the house offsets any peculiarities that may exist in the construction of the roof. We have had so many calls for houses with bath rooms on first floor that we have developed this design to meet this special need. We have, on the first floor, living room, dining room, kitchen, pantry and bath. Entrance to the pantry may be had through the kitchen and dining room as well, making it especially convenient. The fire place in the large living room adds cheerfulness to the interior and makes heating of the house economical. The stair hall may be closed off from the other rooms if desired, preventing waste of heat if it is desired to heat the house with stoves.

Landing on the second floor is in a front hall which leads directly to the four bedrooms. One of the rear bedrooms may be converted into a bathroom at a very slight additional cost, since one set of "roughing in" plumbing material may be utilized for both bathrooms. Everything we furnish for this house, as in all of our other designs, is strictly **Brand New** stock and we ask that you carefully read over our **Free Plan Proposition** and a description of the material that we supply for the construction of these designs as detailed in the preceding pages of this catalog.

8 ROOMS AND BATH

THE size of this handsome house is 23 ft. 6 in. in width by 29 ft. 6 in. in depth. It is drawn on artistic lines and with its front gable and tower presents a very imposing appearance. The front porch extends several feet beyond the width of the house, and extends back on the left side so as to admit of a door to the dining room, which feature appeals to people who are fond of out-door life. What is there more desirable on a hot summer's day, than a magnificent shady porch, with its broad lines and artistic colonial columns and balustrade.

The interior arrangement is comfortable and cosy. The pantry has direct communication with kitchen and dining room and also stairway leading to the basement. The fire-place in the corner of the living room gives the interior a very pleasing effect, while the large cased openings connecting the dining room, living room and hall adds roominess to the whole house. We especially call attention to the handsome stairway leading to the second floor. In design and arrangement, this stairway would grace any home of double its cost and it shows off effectively immediately upon entering the house. The landing on the second floor is directly in the center, with ready access to all four bed rooms and bath. The house is extremely well lighted and ventilated and on the whole will make a comfortable home for anyone at a very moderate cost.

We refer you especially to the beginning of this book for further information on the material that we furnish for these designs and urge you to take advantage of our **Free Plan Proposition** as outlined if you contemplate building in the near future.

8 ROOMS AND BATH

THIS house is 29 ft. 6 in. by 32 ft. It has been designed to meet the special requirements of those who from choice or the necessities of their situation want all the conveniences on the main floor of the house, yet prefer a two-story house to the one-story cottage. The house has many attractive and artistic features, though it is not always possible for the designer to bring out the salient lines under the restrictions imposed by the space available for its reproduction in a catalog of this size. The harmonious effects would be better appreciated from an inspection of the scale drawings. To that special class who demand the conveniences as here arranged, this house offers many advantages.

We have on the ground floor, three good sized living rooms, bedroom and bath room. The stairway leading from the living room is of the open order and access to the basement may be had directly underneath it, thus economizing the available space. On the second floor are four good sized bedrooms, each provided with a closet. The house is well lighted and perfectly ventilated and is in every respect a comfortable and convenient home. The interior arrangements may be altered to meet special requirements.

The porch is exceptionally large and desirable, extending on the left side beyond the front of the house proper and giving it an imposing, artistic, as well as unusually massive appearance.

Kindly read our **Free Plan Proposition** as outlined, and for a description of our materials, you are earnestly requested to carefully read our **Material Specifications** section in preceding pages. "You will profit by so doing."

8 ROOMS AND BATH

THE design shown herewith is a modern house, of liberal dimensions and extremely handsome effect. In size it is 29 ft. wide by 33 ft. 6 in. deep, exclusive of porch, and it has every convenience and all the requirements of an up-to-date home. As already stated in our introduction, these houses are not picture houses but practical in every respect, and have been designed from suggestions, in many cases made by our customers or developed from many years of experience in actual construction. In presenting this design, we have sought to harmonize every feature. The front gable, the dormers, the wide porch, the bay windows, all lend to the general beauty of the house, while in the interior, it is as perfect as human ingenuity can make it. In the parlor we have a handsome fire-place flanked on either side by leaded glazed windows. The beautiful bay window in the dining room gives not only ample light and perfect ventilation but an extremely pleasing effect which is further enhanced by the leaded glass window in the rear of the room. The kitchen is large and well lighted and entry to the commodious pantry is affected through either the dining room or kitchen. We have besides a small room entering into the kitchen intended for a wash room or lavatory. On the second floor we have four good sized bedrooms, bath room and plenty of closets. Altogether, this house offers anyone wishing a modern, up-to-date roomy home, every advantage and convenience of a house of much higher cost.

The materials we furnish for this design are all extra good qualities and are described generally in this book under the head of "Material Specifications." We also ask you to read our Free Plan Proposition by which you can get full and complete information regarding any of our designs.

8 ROOMS AND BATH

THIS design shows a further development of the two story bungalow pattern with veneer cement on the outside; a method of construction very popular. The size of this house is 24' 6" wide by 30' 6" deep, and with its massive porch across the front and heavy dormer in the roof, has a very substantial and lasting appearance.

The interior of this house may be developed into many changes and artistic arrangements. The extreme simplicity is one of the crowning features of this design and makes it so desirable to many people. The interior arrangement is very much like some of our other houses but still has individuality enough to give it distinction. The house has seven rooms, hall, pantry, bath room and four closets. It is extremely well lighted and ventilated and possesses every convenience. Communication between rooms is facilitated by large case openings. The stairway is modern in design and construction and easy of ascent. The closets are properly and conveniently placed and everything has been arranged to meet the requirements of a modern home.

In the selection of materials for the construction of this design, we have been governed by the general character of the house. Everything we supply is strictly brand new stock, the quality being in keeping with the general design.

We refer you for a more detailed explanation of the material we furnish to our "Material and Specification" section and also ask you to carefully read our Free Plan Proposition as outlined on preceding pages.

8 ROOMS AND BATH

WE have affected various combinations in the designs we are offering in this book, but none of them, we think, is more striking than this. The size of this house is 30-6 feet wide by 30 feet deep, exclusive of porches. The external appearance is something out of the ordinary, and striking; the lower half being finished with shingles and the upper half with cement plaster, but this combination may be easily changed to suit individual taste without detracting from the general attractiveness of the house, and we shall be pleased to furnish prices for either siding or shingles or a combination of the two, whenever desired. The large, square-built-up columns, with the wide sweep of frieze on the front porch, makes the approach very impressive and imparts an appearance of massiveness to the house that is pleasing.

Entrance to the house is made directly into a reception hall of ample size, from which a handsome open stairway leads to the upper floor. This stairway is also accessible from the kitchen by separate steps to the landing, where a door is placed.

The large cased openings connecting the living room, hall and dining room lend roominess to the interior. The stair lands on the second floor directly in the center of the house, with direct access to the four bedrooms and bath, each bedroom being provided with a closet of ample size. We call especial attention to the fact that every bit of space is utilized to the best advantage.

The rooms are laid out with a view to comfort and convenience, while the many windows are large and placed to provide ample light and perfect ventilation. The attractive fireplace in the front room lends cheerfulness to the whole interior.

As in all our other houses, everything that we furnish for same is strictly brand new, first-class stock, guaranteed grades, and our Material Specifications will give you most valuable information regarding same. If you are interested in this design, it is well to read our free-plan offer on preceding pages. You will get a much better, clearer and more satisfactory idea of what goes into our designs and how complete we furnish them.

9 ROOMS AND BATH

IN the above we show a design that is 30 ft. wide by 30 ft. deep, and it is especially designed to meet the requirements of that class of people who do not wish to be crowded for room in their homes. The massive porch on the front and the wide projecting eaves as well as the handsome dormer in the roof give the external appearance a certain attractiveness that is not always possible to obtain in houses of this size. Front door opens directly into the center hall which communicates by cased openings with rooms on either side. These cased openings may be enlarged to suit individual tastes so that the entire front of the house may be thrown into one large room. This arrangement is in great demand at the present time and offers greater advantages for domestic enjoyment than any number of smaller rooms. The wide stairway leading to the second floor lands in the hall which is lighted by a window on the stair landing. There are five good sized bedrooms and bath room on the second floor with plenty of closet space. Altogether, this house is not only roomy and comfortable but modern in every respect. The interior arrangement may be altered to meet individual requirements without increasing its cost, and to those who like comfortable dimensions and modern conveniences, this design offers many advantages.

The material we furnish for the construction of this house is strictly **Brand New** stock and of exceptionally good quality. We invite your attention to the detailed explanation in the preceding pages of this book for further information along these lines. We furnish **Free Plans**, specifications and list of material with each of our designs.

6 ROOMS AND BATH
IN EACH APARTMENT

IN design No. 143, illustrated above, we show a double house which by reason of its compactness can be built at a figure so low as to offer a big return on the money invested. Its external dimensions are 40 ft. wide by 31 ft. deep, full two stories in height and with an abundance of room in the attic that may be utilized for several additional rooms if so desired.

There are three good sized living rooms on the first floor with front hall and pantry. The basement stairs are directly under the front stairway, thus utilizing the room to the best advantage. On the second floor we have three good sized bed rooms and a large bath. The bath room is located in the front of the house in a space that would otherwise be useless. The house is exceptionally well lighted and ventilated and it has all the conveniences of a home in an exceedingly small and compact space.

The exterior appearance is especially pleasing with its wide front porch and large dormer in the roof.

The materials we furnish for this design are all strictly **Brand New** stock as more fully described in preceding pages of this book. We also furnish **Free** Plans, specifications and a complete list of material and ask you to kindly read our offer as outlined.

In drawing these designs it has been our constant aim to keep the cost of the building down to the lowest possible figure; not only the cost of the materials, but the cost of labor as well, without sacrificing any detail. We recognize the fact that correct and practical lines are as important as modern conveniences. First impressions are obtained from exterior appearances, and if this is unfavorable, the interior comfort counts for nothing. Therefore, while we have endeavored to carry out the harmonious relations of comfort and pleasing exterior, we have drawn the line sharply at the wasteful

methods so frequently employed by inexperienced architects who imagine that the practical value of a building is measured by the cost of its construction. No design has been developed to greater perfection than this handsome double house, and as a result it offers an investment which for its earning capacity and security is seldom equaled.

SIZE, 37' 6" x 43'
EXCLUSIVE OF PORCHES

APPROXIMATE PRICE, \$1190.00
(SUBJECT TO MARKET CHANGES)
Write for Actual Delivered Prices

7 ROOMS AND BATH IN
EACH APARTMENT

IN the above we show a two family house, size being 37 ft. 6 in. wide by 43 ft. long, exclusive of the porch. Each side has seven rooms, bath and pantry. There is a large front porch that can be divided for each tenant if desired, for the entrance is made through separate vestibules, each connecting directly with the living room. The house has an attractive open stairway in the living room which is connected with the dining room by a large opening. The dining room and kitchen are nicely arranged with a pantry between, also with another small room in the rear, which can be used for either bath, bedroom or storeroom. On the second floor we have three bedrooms and bath with closets for each.

In designing this house, it has been our aim to avoid as far as possible the appearance of a tenement house which is objected to by many people. In exterior appearance it gives the impression of a private residence and in that respect greatly enhances its renting value.

The low price at which we are selling the material required for the construction of this design makes it possible to build this house at a cost to insure a good dividend on the investment. It is modern in design and conveniently arranged and will make a profitable investment in almost any locality.

The material used in the construction of this design as in all of our houses is of first class stock, strictly in keeping with the general character of the design.

It is our constant aim in drawing our plans and developing them to avoid as far as possible expensive and impracticable construction and so reduce the cost of the building to a minimum by eliminating all waste. The character of the material used in the construction of this as in all other designs is correct and practical and will be found described in the preceding pages of this book, and we refer you to our Free Plan Proposition as outlined and solicit your inquiries.

6 ROOMS AND BATH
IN EACH APARTMENT

IN the above design we present a double flat building which has the appearance of a palatial private residence. Size 30 ft. wide by 42 ft. deep. There is absolutely nothing about this design that would stamp it as a flat or tenement house. The large front porch extending across the entire front of the house is roomy and comfortable, yet the single door entering into the house gives no indication that this is used for two family purposes. The Colonial windows in the front of the house make an imposing and attractive appearance and the pilaster running up to the eaves on the front add to the general attractiveness of the design.

The interior arrangements are exceptionally convenient and modern. Each flat with its separate vestibule entrance is strictly private and has all the conveniences of a modern home on one floor. The living room, dining room and kitchen being on one side and the bedrooms and bath on the other, each side entirely independent of the other—this gives a privacy to the latter part of the house that is very desirable.

There is a large reception hall, living room and dining room, all being connected by cased openings which practically throws these rooms into one apartment. The chambers, bath room and kitchen are easy of access from the center hall, the pantry leading off the kitchen at the rear of the house. The back door opens on the rear porch which is covered by separate roof and gives to each tenement a private entrance to the back yard. The basement stairs being directly at the foot of the back porch makes it easy of access for both tenants.

The house is supplied with two chimneys, which simplifies the heating proposition.

6 ROOMS AND BATH
IN EACH APARTMENT

THE above two-family flat building is designed especially to enable people of moderate means to not only enjoy the comforts of a home of their own but to realize an income on the investment as well. Economy of construction in material and labor has been followed throughout the entire building. This is a practical illustration of a solid, strong and attractive semi-colonial design building, which can be built at an extremely low price.

The bath rooms are accessible from hallways and are both located so that all piping can run through one partition and supply them both. Each apartment has its own private entrance as well as an entire private basement floor. All unnecessary fancy scroll and ornamental work has been eliminated, and we believe that for general utility, design and economy, this two-family dwelling will be hard to equal.

The size of this house is 28 feet wide by 38 feet long, not including the porches. It has three rooms and pantry on the main floor and three fair-sized bed rooms and bath on the second floor on each side. It is supplied with numerous windows placed in appropriate positions to insure proper light and perfect ventilation. This house will make a good investment in almost any locality in which it is placed. We commend it strongly to people of moderate means who want a home of their own but cannot afford to have all their money tied up for that purpose.

We will furnish you with plans, blue prints and specifications as outlined on a former page of this book, and shall be pleased to answer any inquiries regarding this design.

7 ROOMS AND BATH

IN design No. 118 we show a modern cottage of Colonial architecture that meets with instant favor of those who prefer a cottage to a two story house. In size it is 24 ft. wide by 42 ft. deep in addition to its porches. Its trim outlines and its unusually large porches, with nearly 350 square feet of floor space, makes this cottage an ideal country home.

In interior arrangement and convenience, it has all the opportunities of a two story house, there being a parlor, dining room, kitchen, pantry, chamber and closet on the first floor with three moderate sized chambers and bath room on second floor. There is a door leading from the dining room and another from the kitchen to the back porch which offers many conveniences. The windows are large and placed at convenient positions to insure ample light and perfect ventilation for the entire house.

In offering this design to our customers, we believe that there are few houses that for cost of material and construction, will compare with this. In laying out this house, we have aimed to eliminate every possible waste both in material and cost of labor and since it has been put on the market a short time ago, we have received many commendatory letters from satisfied customers.

The heating arrangements have been provided for by two chimneys making it easy to heat this house either by stove or furnace at a minimum cost, and the cost of the bath room equipment and plumbing installation has also been considered, and we are confident that for the space provided and the conveniences, this cottage will appeal to people of moderate means and good taste.

The materials supplied for this as for all of our designs is strictly **Brand New** stock as outlined under the heading of **Material Specifications**. Also ask your attention to our **Free Plan Proposition** as outlined in preceding pages of this book.

7 ROOMS AND BATH

In presenting House Design No. 115, we are showing one of the very best and most practical semi-bungalow type designs, the result of careful study and work-out. It is a house that meets the requirements of those wishing to take advantage of all possible space as well as arrangement of conveniences. There is a growing demand for houses of this class for the reason that they offer the maximum of convenience at a minimum of expense. Here we have a complete house on one floor—dining room, living room, bath room, pantry and spacious closets all on the first floor. The dining room and living room can be thrown together and will make a combined room of 13x27. The chamber, with the bath room immediately adjoining, is a great convenience, which is readily appreciated. The kitchen is thoroughly modern, has a good-sized pantry, as well as an opening on the porch for receiving ice without the necessity of carrying same through the kitchen—which usually means that you have to stay at home and wait for the ice-man, and, when he gets through, wash up the floor. There is also a convenient entrance to cellar direct from the kitchen, enabling one to get to this part of the house regardless of weather conditions.

In this design, we have eliminated the reception hall and fancy stairway, following more closely European lines laid out along strictly common sense, sanitary and labor-saving ideas, but at the same time utilizing every inch of space. Through the living room we have direct entrance to stairway, also passage to chamber. The stairway leads up to second floor without a turn, giving entrance to the three rooms within easy reach of the landing. All rooms are well ventilated, have spacious closets set aside for each chamber with a window in each closet. The closets are exceptionally large, being about 7x5 each. The sewing room can be arranged as a child's room or as an additional bath room, being 7x11 in size.

The general construction is modern, up-to-date and solid in every respect. Siding is used below the belt course as shown in the photograph, shingles above. A very artistic effect is gained by brackets supporting the overhang of the roof, with exposed rafters for the entire design. The outside wall is run down to within five inches of the ground, carrying out the general effect of the bungalow style and doing away with the necessity of expensive foundation. This design can be depended upon to be serviceable in every respect. It is easily and cheaply constructed and housekeeping within it should be a delight.

6 ROOMS AND BATH

WE present herewith a bungalow intended for a wide city or suburban lot. In size it is 39 ft. 6 in. by 27 ft. deep. It has a living room, dining room, kitchen, pantry, three bed rooms and a bath room and is in every way a complete and modern home on one floor. The fire-place in the corner of the living room adds cheerfulness to the surroundings. All the rooms are of easy access from the living room of the house. There are no waste spaces where not needed and the whole plan has been developed not only for convenience and beauty but in harmony with the general character of the bungalow pattern. For a summer or suburban home, this class of house offers many advantages not possible in designs of different construction, and we especially recommend this design to people of good taste and moderate means as an ideal home at a comparatively small cost.

The Bungalow pattern of construction was at first employed only in houses intended for temporary use, but their beautiful outlines and great convenience soon brought them into rapid favor as suburban and city homes. In this design we show one of the most pleasing examples of this deservedly popular style.

The material we furnish is all **Brand New** stock as described in our **Material Specifications** and we also furnish **Free Plans**, specifications and list of material for each of our designs as outlined in preceding pages.

6 ROOMS AND BATH

DESIGN No 119 is a further development of the bungalow pattern of house construction; with its six rooms, pantry and bath, it has all the conveniences on one floor. In size it is 31 ft. 6 in. wide by 38 ft. long, exclusive of the porch with a hip roof and wide eaves extending over the porch. It carries out the extreme simplicity characteristic of this style and is exceptionally pleasing to the eye in external effect. Entrance is made directly into the living room from which all the other rooms are easy of access. The house has an abundance of closets and every convenience required. The windows are large and numerous and placed to insure ample light and perfect ventilation. The interior can be changed to suit individual tastes if desired, as there is ample floor space to work on.

This design appeals strongly to people who prefer the bungalow style of construction. As by reason of its compactness of arrangement, it may be constructed at a minimum cost and still provide all the essential conveniences of a modern city home.

The material we supply is all strictly **Brand New** stock of a quality in keeping with the general design. For further information as to the quality of the stock we furnish, we refer you to our **Material Specifications** section where our material is described in detail. We also supply **Free Plans** specifications and list of material showing the purpose for which every item is intended. A careful perusal of these sections will be of inestimable value to you.

4 ROOMS

IN the above design we illustrate a four room cottage of the bungalow pattern, 26 ft. wide by 22 ft. deep, with a wide porch in front, the roof extending over the entire house and porch under one framing. This house has the wide projecting eaves and extreme simplicity that stamps the bungalow pattern and with its low wide dormer in the roof and the colonial windows, makes a pleasing appearance.

The design is primarily designed for summer use but has grown in rapid favor as a suburban home and in many cases is used for a permanent home. This house is of moderate size and within its limited space, modern conveniences are, of course, impossible but the design may be developed along more imposing lines and may be made a comfortable and convenient modern home. On the preceding pages, we illustrate some larger designs which show what may be done with houses of this character.

The material we supply for this design, as for all our others, is strictly **Brand New** stock, good quality in keeping with the general character of the house. We refer you for further information regarding this to our "**Material and Specification**" section in this book where a full description of the material will be found. We also ask your attention to our **Free Plan Proposition** as outlined in the preceding pages. Shall be pleased to answer any inquiries relating to this or any other house pattern.

Plumbing Equipment for this house includes 1 No. K40 Flat Rim Sink; 1 30-gallon galvanized iron range boiler. All necessary galvanized iron supply pipe, fittings, lead trap for sink and faucets. Everything to make the outfit complete above the ground line, supplying hot and cold water to kitchen sink and including soil pipe. Does not include water front for stove. Price..... \$18.00

**5 ROOMS AND
BATH**

IN the above, we illustrate a cosy cottage of five rooms and bath. Its size is 23 ft. 6 in. wide by 33 ft. deep, not including porch. It is of neat and pleasing exterior. The wide porch across the front gives it an air of comfort and coziness.

Though of moderate dimensions, the interior lay-out is convenient and comfortable. The location of the bath-room makes it easy of access from the dining room, kitchen or chamber. The main rooms communicate with one another by cased openings, thus adding to their roominess and comfort. A seat may be placed in the projecting bay window in the living room if desired.

This cottage is especially adapted to people of modest means and good taste. The price at which it may be built enables almost anyone to secure a home. Don't pay rent. The rent will pay for this cottage in a few years, and the natural rise in value of real-estate holding will net you a good profit. In the meantime, you will enjoy the satisfaction of living in your own home.

Read our Free Plan and Material Specification section and then write us for the plans. We shall be glad to make you a delivered price on the entire material required to build this or any other house in this book.

6 ROOMS AND BATH

THE above design is 20 ft. wide by 28 ft. deep exclusive of the porch and has been developed along the lines of a modern home and provided with every essential convenience possible in the limited space available.

The front elevation shows a colonial pattern, the square paneled porch columns giving it an especially striking and handsome effect, which appeals strongly to people of good taste. There are three good sized rooms on the first floor, in addition to the front hall, and so arranged as to make communication between them especially easy. On the second floor, we have three bed rooms and bath, besides the usual closets. Also the large front room can be divided so as to have a child's room or sewing room by merely moving one partition and adding one door, the extra cost of which would not amount to over three or four dollars.

With a chimney placed in the center of the house, the whole house may be easily heated in the most economical manner either by stove or heater in the basement.

This design presents many features that appeal to people of moderate means as it offers many conveniences at a very low cost. The price at which we are selling the material for this design is exceptionally low and will enable anyone to secure a comfortable and modern home for very little money. The material we furnish is all strictly BRAND NEW with the quality in keeping with the general character of the design, and we ask you to kindly read our **Material Specifications** also our **Free Plan Proposition** as outlined in preceding pages.

7 ROOMS

IN the above design we present a cosy cottage of pleasing effect, the size being 20 feet wide by 28 feet long and for its size it contains more available room than many houses of larger dimensions. The wide sweep of roof and large dormer make it practically a two story house. The roof extends well over the front and the heavy corbel effect on the front girders, in addition to the bulkheading around the porch, makes the design exceedingly attractive.

In interior arrangement the house contains all the conveniences possible for its size. There are three fair sized rooms on the first floor besides front hall. Entrance to the basement is effected through the kitchen directly under the main stairway. The main stairway is of open design and modern construction and lands directly in the center of the house on the second floor. The second floor has four bedrooms all good sized, with closets. One of these rooms may be converted into a bath room. All the rooms on the second floor have direct entrance to the hall.

The house is well lighted and ventilated and by reason of its compactness can very easily be heated by stoves or heater in basement.

By referring to the Material Specification Section of this book, you may gain a better knowledge of the class of material we furnish for the construction of this house, and, at the low price at which we are offering this material, anyone may secure this comfortable home at a very moderate cost.

6 ROOMS AND BATH

IN this design, we illustrate a comfortable story and a half house. It is 21 ft. 6 in wide by 30 ft. long with 14 ft. studs making a comfortable story and a half house, enabling us to utilize the space on the upper floor to better advantage. The living room and dining room are exceptionally large and with a cased opening between them and the hall, these rooms are practically thrown into one apartment, making a large living room, an effect that is so much in demand at the present time. On the second floor, we have three good bedrooms and a bath room with plenty of closet space.

We call your attention to the small amount of room required for the center hall on the second floor from which direct entrance is made to all the bedrooms and bath.

Every bit of space has been utilized to the best advantage and all in all it makes a very desirable and cosy home for people of limited means. The material we supply is all strictly **Brand New** stock as described in our **Material Specification Section** and we also ask you to carefully read our **Free Plan Proposition** which gives all the necessary information on this subject.

In laying out this house the same care has been used as in our larger designs. No detail has been overlooked that would improve the exterior effect, or interior comfort or cheapen the cost of construction. Whether small or large the prices at which we are selling the material for these designs cannot be equaled anywhere.

6 ROOMS AND BATH

WE show here a design with a Mansard roof arrangement which is giving satisfaction wherever it has been built. The size is 21 ft. wide by 28 ft. deep, and with its six rooms, bath, and basement, makes a very complete and up-to-date home at a very low cost. The construction of this house enables us to utilize the space to the best advantage, and we believe that for its size it offers more conveniences than many larger houses. The stair effect for such a small house is striking and pleasing, going directly from the large living room into a hall on the second floor from which individual entrance is made to the bedrooms and bath.

Kindly note the large amount of closet room on the second floor which is unusual in a house of this size.

The first story and gables are intended to be furnished with beveled siding and the Mansard roof with shingles. The large Colonial columns on the front porch harmonize well with the general exterior appearances of the house.

The material we furnish is all **Brand New** stock and in entire keeping with the general character of this design. We furnish free plans, specifications and bill of material for each one of our designs and we call your special attention to the "Material Specifications" and urge you to take advantage of our liberal **Free Plan** offer if you contemplate building.

6 ROOMS AND BATH

THE above design illustrates a one and one-half story house, 21 ft. wide by 29 ft. 6 in. and it can therefore be placed on a 25 ft. lot, if required. This house is of moderate dimensions but for its size, offers every convenience possible. On the first floor we have a large living room, dining room, kitchen, pantry and hall, all arranged in such a way as to make communication easy and convenient, and the basement may be reached directly through the pantry under the front stairs. On the second floor, we have three fair-sized chambers each provided with an abundance of closet room. In case of special need, one of these chambers may be converted into a bath room, which would give the house every modern convenience. The house is provided with numerous windows of ample size to insure good light and ventilation and with our plans, specifications and list of material and the low price at which we are selling the material required for this design, anyone may have a cosy, comfortable home at a very small outlay.

We call your special attention to our **Free Plan Proposition** and ask you to also read our **“Material Specifications”** as outlined in the preceding pages of this book. This information will give you a very good idea of the quality of material we furnish, and if you are going to build do not fail to read all carefully.

6 ROOMS

THIS neat and comfortable cottage has a capacity of six rooms within space of 24 ft. by 24 ft. and is very little higher than an ordinary one-story house. We are furnishing material to build this house as a winter house, including sub-flooring and boxing because it is a house that will meet the requirements of very many people. The window and door openings are trimmed with our plain mitered casing for paint work. For any who desire to use this design as a summer house we can omit the sub-flooring and boxing. On the second floor are two fair sized rooms with ample space for closets or store rooms. The first floor has large living room, two bedrooms and a good-sized kitchen. While the house is planned to heat with stoves with the use of

one chimney, this can be changed very readily and a fire-place put in between the two doors. We furnish nothing but new material in this or any of our house designs, all of which is fully described in our List of Material, which also gives our catalogue numbers on doors and windows, finishing material, hardware, etc. By the use of our **Free Blue Print Plans and Material Bill**, anyone who is in any way familiar with building can complete one of our designs.

Plumbing Equipment for this house includes: 1 No. K40 Flat Rim Sink; 1 30-gallon galvanized iron range boiler. All necessary galvanized iron supply pipe fittings, lead trap for sink and faucets. Everything to make the outfit complete above the ground line, supplying hot and cold water to kitchen sink and including soil pipe. Does not include water front for stove. Price.....\$18.00

3 ROOMS

THIS is a three room cottage of the gable roof construction. Entire width is 28 ft. and depth 25 ft. 6 in. with ample size front porch.

Some people prefer a house of this construction, and it offers some conveniences, especially for one with only three rooms. This could be built without the convenience of the pantry if it is desired to cheapen the house. On the other hand the pantry is large enough to use as a small bedroom, or can be divided into a pantry and bath-room—either of these changes we can make upon request.

We furnish this house regularly with our sub-flooring, boxing and shingles. Our interior trim is for paint work which we furnish in our plain mitred casing and moulded base. For slight additional cost we can furnish this in clear Georgia Pine trim for natural wood finish, either in mitred casing or with moulded cap heads over our pilaster casing.

This house will also make a convenient summer house for sea-shore or lake, and we can furnish it with our Rubberized-Galvo roofing and drop siding, omitting the sub-flooring and boxing at a considerable less cost.

The material we furnish is all brand new, and with the use of our Plans, Specifications and List of Material, you will be enabled to build this house at a very moderate cost; everything is clearly shown on our Blue Prints, and our List of Material gives our catalog numbers on doors, windows, finishing material, etc., etc., thus anyone reasonably familiar with building construction can successfully complete any of our designs.

Plumbing Equipment for this house includes 1 No. K40 Flat Rim Sink, 1 30-gallon Galvanized Iron Range Boiler.

All necessary Galvanized Iron Supply Pipe, Fittings, Lead Trap for sink and faucets. Everything to make the outfit complete above the ground line, supplying hot and cold water to kitchen sink and including soil pipe. Does not include water front for stove. Price.....\$18.00

4 ROOMS

IN the above we illustrate a neat four-room cottage, size 24 ft. by 24 ft., primarily designed for summer or seashore use, but it may be easily arranged for permanent occupancy by a slight change in the construction. Drop siding without sheathing is used for siding purposes, and the roof, our famous 3-ply Rubber-Galvo patent roofing, over dressed and matched roof sheeting laid solid. Of course, it is impossible in a house of this size to include all the modern conveniences so generally demanded in building construction at the present time. The design may be increased in size to suit individual necessities and the above is merely a suggestion of what may be done along this line.

In adapting this house for permanent use, the material we furnish is slightly different from that supplied if intended for a summer home, but the quality and character of the material are fully described in our bill of material that we furnish for each of our designs, and to anyone interested in this cottage, we shall be pleased to supply all the information required.

Do not forget that we bestow the same care in the selection of suitable material in the small as we do in the large houses. Harmony of design and economy of construction are never lost sight of, and our patrons have the assurance that everything has been worked out to the last detail.

Write us for prices on this design built with siding, sheathing, sub-flooring and shingles, instead of as above.

Plumbing Equipment for this house includes: 1 No. K40 Flat Rim Sink. 1 30-gallon galvanized Range Boiler. All necessary galvanized iron supply pipe, fittings, lead trap for sink and faucets. Everything to make the outfit complete above the ground line supplying hot and cold water to kitchen sink and including soil pipe. Does not include Water Front for stove.
Price.....\$18.00

Paint for entire job, including hard oil finish for interior for two coat work (including porch floor paint, but no other floor or roof paint).....\$16.99

Hot Air Furnace.....\$59.80

Steam Heating Plant.....\$102.68

Hot Water Heating Plant.....\$118.23

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

Barns.

The barn is the farmer's workshop. It is as needful to his success as the store is to the merchant. The farm animals are his helpers. Proper housing, and adequate provision for their health and comfort, with a minimum outlay for feed and labor, will return as big a dividend as a well-built, well-equipped factory does to the manufacturer. A modern barn lends cast to the whole surroundings and enhances the beauty and value of the farm many times its cost. Do not be without one. Read what follows, then write us. We are at your service and can save you money.

In the following pages we illustrate a number of barn designs to meet the various demands of the American farmer and stock raiser. In developing these designs, we have followed the same careful methods in design and construction, as in our house patterns. Our aim has been to reduce waste to a minimum and select only such materials that will not only serve the purpose for which they are intended to the best advantage, but may be placed in position at the smallest possible cost. The old method of heavy timber construction is no longer followed by experienced builders and architects, because it entails not only an excessive and entirely useless expense, but is not susceptible to adaptation of modern requirements. For this reason we have adopted the built-up, or joist frame, design wherever possible. This method of construction is now generally acknowledged to be not only the strongest but cheapest as well, and it has advantages that are not possessed in the old style of construction formerly in use.

Free Plan Proposition.

The cost of preparing reliable plans, specifications and material by competent architects is a considerable item of building expense, and it often happens that the details must be worked out by the builder himself, for the reason that many architects are not familiar with local conditions. We furnish our customers with complete sets of drawings fully explaining the construction of every part of the building absolutely free. All that we require is a deposit of \$2.00 to protect ourselves from the merely curious, and when material is purchased from us we will credit you with the \$2.00 paid for the plans. We not only furnish the plans, but we furnish a complete set of specifications and a material list describing material and location, so that anyone reasonably familiar with building construction will have no difficulty in erecting any one of these designs. Our plans are made by experienced and practical men who have been in touch with building operations of all kinds for many years, and are familiar with conditions in different parts of the country, so that the plans are entirely practical.

Specifications and Bill of Material.

In our specifications we tell just exactly the quality of material that we propose to furnish for any one of the designs, so that a purchaser knows beforehand what he may expect to get. We make everything so plain that there can be no misunderstanding. In our list of material we specify the size and length of the various items, and state plainly the purpose for which they are intended, so that the builder will have no difficulty in selecting the material for the different kinds of work and thus avoid unnecessary waste and labor.

By our system of doing business we are able to effect a substantial saving for our customers. Our position in the market enables us to take advantage of every bargain proposition that presents itself. There are many manufacturers who are forced by business accidents to convert their goods into cash without delay to meet pressing obligations, or who have been thrown into the hands of receivers. We buy these stocks frequently at our own price and so are able to effect a saving for our customers of from 25% to 50%. Besides this, we furnish plans free. If you contemplate building, it will be to your advantage to avail yourself of our very liberal offer and correspond with us at once.

General Specifications and Description

Of Material We Propose to Furnish for the Construction of Our Barn Design.

Lumber.

Posts and Girders. We will furnish the necessary quantity of 2-inch material for posts, girders and braces shown on our blue print plans, all of the correct sizes and lengths and of good grade, sound and square-edged, Southern pine.

Studding, Joists, Rafters, Etc. The required quantities of studding, joists, rafters, etc., are furnished in Southern pine in the proper lengths to work most economically and to the sizes shown on plans to insure the correct equalization of strength and symmetry.

Sheathing. For the roof, we furnish dressed and matched sheathing in all cases where our prepared roofing is used. The quality to be suitable for this purpose is more fully described in our list of material. Whenever shingles are used, we shall furnish square-edge Southern pine boards of standard widths and lengths surfaced two sides.

Barn Boards and Siding. In all of our joist frame designs, we supply barn boards of No. 1 soft Arkansas pine, 12 inches wide and of such lengths as are necessary to make a first-class job in every particular, and for the joints we supply 24-inch O. G. battens. In the balloon type of construction, we supply 1x6 No. 1 soft Arkansas pine, drop or novelty siding, in sufficient quantities for the entire building.

Hay Loft Flooring. For the hay loft flooring we furnish 1x6 No. 2 Southern pine dressed and matched flooring in sufficient quantities to cover the floor as shown by our blue print designs.

Driveway Flooring. In our bank barn designs, where a driveway is shown through the center, we will furnish 2x6 dressed and matched No. 1 Southern pine flooring for driving purposes.

Exterior Finish. All of the exterior finish, such as corner boards, fascia, frieze, etc., where shown on blue print plans, will be supplied in No. 1 Arkansas soft pine material in sufficient quantities to carry out the plan as shown by the drawings.

Roofing. All prices for these barn designs named herein are based upon the use of our celebrated 3-ply Rubberized-Galvo roofing, which we furnish in all cases unless otherwise ordered by customers. This is the best grade of roofing manufactured and is entirely suitable for the purpose and will give good satisfaction.

Shingles. Whenever requested, we shall be pleased to supply shingles for roof in place of the Rubberized-Galvo roofing. We can furnish Extra Star, A Star or 5 to 2 clear red cedar shingles or the usual grade of white cedar shingles, whichever may be preferred, at a small extra cost.

Galvanized Iron Roofing. We are in a position to supply, upon request, in place of our prepared roofing, galvanized iron roofing, either flat or corrugated, of our regular No. 18 grade in sheets 26 inches wide by 6 inches in length at a small extra cost.

Sash and Window Frames. We supply all window frames shown on the blue print plans and specified in our list of material in the "knock-down" and also all sash frames in our bank barns for a cement basement. For all other frames, the material only will be furnished. We also furnish all the necessary sash and windows shown on the plans, glazed with double strength American glass. All in good, sound, No. 1 stock of the required sizes and quantities as shown on our list of material.

Door Material. For all the doors we furnish 1x10-inch stock for bottom rail, 1x6 for top, middle rails and stiles, and $\frac{3}{4}$ No. 1 Southern pine ceiling for the panels. We furnish this stock in sufficient quantities to make the door of double thickness.

Hardware. We furnish all the necessary hardware, such as nails, all in the correct sizes for use in the different materials, also all other hardware such as hinges and track for doors as shown, hangers, hasps, butts and hooks for all barn sash. For double hinge windows we will furnish sash weights and sash lifts and locks and the necessary cord to hang the windows.

Galvanized Iron Work. Where valleys are shown on the blue print plans with shingled roof, we will supply the necessary galvanized iron of the correct widths and lengths for the valleys to insure a perfect job.

Interior Arrangements. We show on the various ground floor plans of the different size barns, arrangements for stable construction. These arrangements, however, are merely suggestions, as individual wants vary to such an extent that it is impossible to suit all classes of customers. We shall therefore be pleased to make whatever alterations that are suggested by individual requirements. The prices named in this book do not include material for interior stable arrangements, as this is a detail that can better be arranged with each individual customer.

BECAPITULATION. From the foregoing specifications and descriptions of material, it will be seen that we agree to furnish you with practically everything to build any one of these popular barn designs, including all lumber, sash, doors, glass, roofing, nails, hardware, galvanized valley iron, etc., everything of BRAND NEW stock. All grades guaranteed and backed by our binding guarantee.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

"MAJESTIC" BARN DESIGN

PRICES QUOTED ARE ONLY APPROXIMATE AND
SUBJECT TO MARKET CHANGES.
DELIVERED PRICES QUOTED ON APPLICATION.

OUR Majestic Barn Design, which was placed upon the market some months ago, is the most modern, up-to-date that has ever been designed. It is of the Joist Frame construction. That is, it is made up of built-up timbers. There is no heavy timber in the entire structure. The advantages of this method of construction are universally recognized for strength, rigidity, economy (both in cost of material and labor) and has the old style timber construction "beaten to a frazzle." The roof is of the self-supporting pattern, each rafter forming a truss, and doing away with all the perloins and posts in the hay mow, which always interferes with the operations of the hay carrier. The special advantages of this construction is the fact that timbers may be built-up of any length without weakening them at any point by reason of joints or splices. The braces, girders, etc., are so placed that the strain is distributed equally at all points and a perfect rigidity of the frame is insured that cannot possibly be equaled by

SUGGESTION FOR FLOOR PLAN MAJESTIC BARN NO. 225

the old style timber construction. In addition, this style of construction gives the largest room for the size that it is possible to obtain, there being no wast space anywhere. It is by all odds the most economical, cheapest and for general purposes, the best barn that a farmer can possibly put up.

We offer this Majestic design in various sizes of the uniform width of 36 feet. The stable ceiling is intended to be 8 feet in the clear with doors at each end and a driveway through the center of the entire length of the building, with the cattle and horse stalls arranged on either side. The stable arrangement shown for the various sizes have been designed with a view to economy of space and labor of feeding

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

FLOOR PLAN MAJESTIC BARN DESIGN NO. 221

the stock, but as it is impossible to anticipate the wants of all classes of buyers, we offer this arrangement merely as a suggestion and we shall be pleased to make whatever changes individual requirements may make necessary, and quote thereon.

The entire upper floor of this barn is devoted to the storage of hay and other fodder and large doors are placed in one gable for the operations of the hay carrier. The barn is exceedingly well lighted and perfectly ventilated, which is one of the most essential features of the modern barn. To insure further sanitary conditions, this barn should be placed on a concrete foundation about a foot above the stable floor, which should also be made of cement. We furnish this design in the following sizes:

SUGGESTION FOR FLOOR PLAN FOR MAJESTIC BARN, NO. 220.

SIZES AND PRICES

Name.	No.	Size.	Height to Plate.	Height to Top of Roof.	Price.
Majestic	220	36x 32	18 feet	38 ft. 6 in.	\$395.00

"	225	36x112	18 "	38 " -6 "	975.00

We will furnish you complete set of Blue Print Plans, Specifications and List of Material for the construction of any one of these sizes upon the conditions already outlined on a former page of this book.

CROSS SECTION SHOWING CONSTRUCTION.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

"STAR" CATTLE AND HORSE BARN

In our Star Design we show a modern cattle and horse barn which we believe will meet the requirements of many farmers who make a business of raising stock on a moderate scale. This building is of the balloon type of construction as shown more fully by our Blue Print Plans. The hay-mow extends to the ground floor and also above the grain rooms on each end of the barn. Cattle stalls are arranged on one side of the hay-mow, while the horse stalls are arranged on the other side. The feed alleys between the hay-mow and stalls makes feeding economical and easy. These feed alleys communicate not only with the hay-mow but also

with the grain rooms at each end. A driveway is provided through the center of the barn, and if desired it may be carried through the hay-mow as well, which feature would, however, reduce the capacity of the latter considerably.

We particularly call your attention to the numerous windows shown in the ground floor plans. There is no part of this structure that is not amply lighted, and the windows together with the ventilation in the roof furnishes an ample supply of fresh air to every part of the building.

We list this barn in one size only, 53 feet wide by 80 feet in length, but if this size does not give sufficient stable capacity for cattle, a lean-to can be built at one end which will furnish sufficient room for fifteen additional head. In this case, the grain room at one end could be consolidated with the grain room at the other to provide for easy access to the stock at that end. In this way, a 12-foot addition at one end would furnish room for 35 head of cattle without interfering with the horse stalls as shown in the plans.

This barn should be placed upon a concrete foundation and the cement floor should be sloped towards each side so that the space devoted to the storage of hay could be kept dry and the stables kept properly drained.

The size of this barn as stated is 53 feet wide by 80 feet long, 8 feet to the eaves and 24 feet to the comb. Price, without stable material.....\$550.00

FLOOR PLAN

STAR BARN DESIGN No. 270

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR "PREMIUM" BARN DESIGN

we believe this arrangement will suit the majority of our customers owing to the economy in feeding the stock which this arrangement makes possible.

The stable ceiling proper is 8 ft. high in the clear with girders supporting the hay loft which extends the entire length of the barn. The roof is of the Gambrel, or self-supporting style, there being no posts or perloins in the center to obstruct the hay-carrying apparatus. This barn has a hay capacity of 1½ tons for every foot of its length and will hold all the hay necessary for the stock which it accommodates.

245

THE general construction of this design is similar to our "Majestic" barn design. It is of the joist frame or built-up timber style of construction and is in many respects the same as our Majestic design except that it is only 12 feet high. In this design the driveway is across the barn instead of lengthwise, there being a pair of doors at each side of barn to permit driving through with fodder for feeding purposes. The smallest of these designs will accommodate nine head of cattle and four horses besides having 2 box stalls and large feed room. While the photograph shows but one pair of doors on each side of the barn, we furnish sufficient material for two smaller doors in the rear of the cattle stalls wherever our floor arrangements are followed.

The interior arrangements shown on the stable floor may be altered when individual needs require, but

246

The barn is well lighted and ventilated, and if placed on a concrete foundation will have all the sanitary conditions of the most modern, up-to-date barn.

The material we supply for this as for all other designs is strictly **BRAND NEW** stock as outlined in our **Material Specifications** on a former page to which we invite your attention. We also want to repeat that we furnish free plans, specifications and a complete list of material with each of these designs in accordance with our **FREE PLAN** offer already explained.

We furnish this design in the following sizes and shall be pleased to answer any inquiries regarding same. Prices do not include material for Stable partitions.

NAME.	NUMBER.	SIZE.	HEIGHT TO EAVES.	HEIGHT TO TOP OF ROOF.	PRICE.
Premium	245	40x42	12 feet	32 feet	\$480.00
Premium	246	40x56	12 feet	32 feet	\$590.00
Premium	247	40x66	12 feet	32 feet	\$700.00

OUR "SUPREME" BARN DESIGN

No. 212

stock. These doors may be changed to the end of the barn and the driveway may be lengthwise through the structure, if preferred.

Inasmuch as this barn is only 32 feet wide, it will be more convenient to make the stock head towards the outside, as that will require less space than if they are placed with the heads towards the center, and our floor plans have been arranged with this end in view. This particular design is especially adapted to the small farmer where a large barn is not required, and we believe will answer every requirement of the modern up-to-date barn.

The building should be placed upon a concrete foundation extending about one foot above the stable floor. The latter should be made of cement and properly sloped to permit of easy drainage.

No. 211

The material used in the construction of this barn is fully described in our Material Specifications on a preceding page, and, if interested, we shall be pleased to supply you with Blue Prints, Specifications, together with a full list of material in accordance with our **Free-Plan Proposition** as already outlined. The various sizes and prices of this barn are as follows: Material for stable partitions not included.

Name	No.	Size	Height to Eaves	Height to Top of Roof	Price
"Supreme"	210	32x40	16 ft.	35 ft.	\$410.00
"	211	32x54	16 "	35 "	\$520.00
"	212	32x68	16 "	35 "	\$630.00

FLOOR PLAN
"SUPREME" BARN DESIGN NO. 210

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR "SUPERIOR" BARN No. 262

IN this design we show a moderate size barn for city or suburban use where a few horses and one or two cows are kept. The appearance of the barn is everything that can be demanded in a barn of this class. The construction is substantial and cheap, yet not cheap enough to detract from its general appearance or usefulness. It is of the balloon type of construction with 2 x 6 for studding and drop siding for the exterior.

The floor is of cement as well as driveway leading to it, and the barn should be placed upon a concrete foundation as shown in our Blue Print Plans.

The size of this barn is 23 ft. 6 in. wide by 40 ft. in length and 12 ft. 6 in. to the top of the plate. Stable is 9 ft. in height with a hay mow above. The capacity of the hay mow is ample for a barn of this size, altogether we believe it meets the requirements of the class for which it is intended.

The material we supply for this building is fully explained on another page, as is also our **Free Plan Proposition** which is applicable to this design as well as to all others.

The price we are asking for the material makes it a big bargain proposition which those who contemplate building should take advantage of without delay.

Size 23' 6" x 40' 0". Price \$245.00 including all necessary material for Stable partitions.

We can furnish our Premier guaranteed barn paint for any of these designs.

We know that, considering price and quality, Premier is the best barn paint on the market for this purpose.

We have the amount required for two-coat work on all of our designs and promptly upon applications will be pleased to name you a price. Also, bear in mind we can furnish Hay Carrier apparatus for any of these barns. Prices quoted in our general catalog.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR "ROYAL" BARN DESIGN No. 230

OUR Royal barn design is especially adapted to city or suburban use and is built more after a house design than a barn design to meet the demands of city customers. This stable is designed to accommodate two to four horses besides giving ample carriage room as well as plenty of room for grain and hay. The stable is 9 feet high, with a stairway leading to the hay mow on the second floor, which will hold about two tons of hay, or more than sufficient for the stock which this barn will accommodate.

FLOOR PLAN
"ROYAL" BARN DESIGN No. 230

We will furnish a complete set of Blue Print Drawings, Specifications, and List of Material in accordance with our **Free Plans Proposition** outlined on another page, and the quality of the material is also described on preceding pages of this book.

This barn is of the balloon style of construction. The outside is covered with drop siding and the roof with our 3-ply Rubberized Galvo Roofing.

Size of Barn 24' 0" wide x 30' 0" long. Price. \$255.00

We can furnish our Premier guaranteed barn paint on any of these designs.

We know that, considering price and quality, Premier barn paint is the best on the market for this purpose.

We have the amount required for two-coat work on all of our designs and promptly upon applications will be pleased to name you a price. Also bear in mind we can furnish Hay Carrier apparatus for any of these barns. Prices quoted in our general catalog.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

"CRESCENT" BARN DESIGN

IN our "Crescent" Design, we show a barn with a balloon frame. The foundation is supposed to be of concrete as well as driveway leading to the barn floor. In the balloon frame we do away with built-up timbers and use instead 2x6 studding for outside. The upper floors are supported by two rows of posts through the center upon which are placed girders of the proper size to hold the upper joints and the roof is likewise supported by perloins running the length of the barn.

In this construction instead of placing the boards vertical we use our regular novelty or drop siding for the outside which makes a very fine appearance besides being considerably warmer. The driveway in this barn runs across the building with the cattle and horse stalls arranged on either side of the driveway. This driveway may be used for feeding purposes by arranging the mangers for stock parallel with it, thus economizing labor in the care of stock.

We are showing this design in three different sizes of uniform width of 40 feet. The entire upper floor is devoted to the storage of hay and other feed and a large door is provided at one end of the barn for the use of hay carrier. In addition to this door, there is another door on the side directly over the driveway which may be utilized where the large door is not wanted, or a window may be placed in the dormer where this door is placed for additional ventilation. This barn will hold a large amount of hay and is in many respects just such a barn as a small farmer will need. The stable floor is well lighted and ventilated and the sanitary requirements have been well taken care of.

Prices do not include material for stable partitions.

NAME.	No.	SIZE.	HEIGHT TO EAVES.	HEIGHT TO TOP OF ROOF	PRICE.
Crescent	255	40x42	12 feet	30 feet	\$412.00
Crescent	256	40x56	12 feet	30 feet	515.00
Crescent	257	40x68	12 feet	30 feet	620.00

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

OUR "UNIVERSAL" BARN DESIGN No. 45

IN our Universal Design, we show another barn adapted to city or suburban use. This barn may be built at a very moderate cost and will accommodate four horses, with plenty of space for carriage room and feed bins, and a hay capacity in the loft of about 2 tons. The stable is intended to be 9 feet high, which will leave ample room on the second floor for the storage of hay and other fodder. The barn should be placed upon a concrete foundation with a cement floor on the first floor, which is more sanitary as well as cheaper in the long run than a wooden floor can possibly be.

In external appearances, this barn presents many attractive features and is well adapted to city use, though, of course, it may be built anywhere.

*FLOOR PLAN
UNIVERSAL BARN DESIGN No. 45B*

It has a driveway through the center, with a pair of sliding doors at either side and a door in one gable to permit the taking in of hay into the loft. This design is provided with double-hung or check-rail windows, which gives it the appearance of a house and adds much to the general attractiveness of the design, as well as providing ample light and ventilation for the interior.

In size it is 26 feet 8 inches wide by 30 feet long and 8 feet high to the eaves. The hay loft is about 12 feet high to the comb of the roof, and we believe this barn is well adapted for many classes of people.

Size of Barn 26' 8" wide x 30' long.

Price \$250.00

This price includes all material for stable partitions.

CHICAGO HOUSE WRECKING CO., 35th & IRON STREETS, CHICAGO.

MODERN FIREPROOF STEEL BUILDINGS

EXCEPTIONALLY GOOD OFFERS IN STEEL BUILDINGS OF ALL SIZES FRAMED READY TO ERECT

\$850.00 for all the material to build this building

We are making special prices on Modern Fireproof Steel Buildings suitable for factories, barns, warehouses, machine shops, foundries, storage, sheds, shops, etc.

The above illustrations are of the most popular Modern Fireproof Steel Buildings, constructed entirely of steel and practically indestructible.

We are making a special price of \$850.00 for material to build this Fireproof Steel Building.

We furnish, ready to set up, Steel Columns, Girths, Lateral and Sway Braces, Roof Trusses, Purlins, Anchor Bolts, Rivets and Bolts for setting up, Corrugated Galvanized Iron for Walls and Roof, Gutters and Down Spouts, Doors and Windows, Hinges, Locks, Nails, etc., to

Only \$37.50 for this Modern, Up-to-Date Bath Room Outfit

IN selecting the Plumbing Material for your house, here is certainly the ideal outfit. This Outfit is positively the highest grade outfit on the market at the present time. Every fixture guaranteed strictly A-grade and perfect in every way. The Bath Tub is a solid, massive, cast iron tub, genuine white porcelain enameled inside and over the roll rim, furnished with ornamental cast iron legs and all nickel-plated trimmings complete to the floor. The Lavatory will be one of our one-piece cast iron, white enameled lavatories, complete with all nickel-plated trimmings above the floor, including brackets, etc. The special feature of this outfit is the closet. We furnish with this outfit one of our enameled steel tank closet outfits. This closet outfit is positively the most modern and up-to-date closet combination ever designed. The ideas embodied in its construction are the latest and most improved that have ever been brought out. Get our big General Catalog and read carefully the detailed description of this outfit. This is our regular No. 44-A Outfit as illustrated and described in our General Catalog, and is positively the greatest bargain that has ever been offered in this class of material up to the present time, and is certainly the best combination you could select for your bath room at any price.

Put a Modern Hot Water Heating Plant in Your New Building

DO not overlook this. If you do, you will be overlooking one of the greatest comforts that could positively be added to your home. It certainly would pay you to sacrifice other points of expense in building the house and put in a modern heating plant, as a heating system of this kind is no longer a luxury; it is a positive necessity, which we can furnish you at a very moderate price.

We strongly recommend a modern Hot Water Heating Plant. However, we can of course furnish you with a moderate priced Steam Plant or Hot-Air Plant if you prefer, and we are able to furnish you the most up-to-date and modern systems in existence.

WE CAN FURNISH ANY OF THESE SYSTEMS

Hot Water, Steam and Hot Air. Do not fail to get our complete Heating Catalog. This fully covers our Heating Proposition. Every plant backed by an absolute Guarantee Bond. You take no chances whatever in the matter. All our material guaranteed absolutely brand new and perfect; the price half of what your local plumber or heating contractor would charge you. We can make you a price that will surprise you.

Write at once for our Information Blanks. Let us send you some blanks that will give you a line on the information we will need to make you a proposition. Fill these out carefully and return them to us and we will send you a complete estimate by return mail on a plant that we will back with an absolute guarantee to heat your house in all conditions of weather.

We have lined up a special bargain offer on the complete heating systems for every one of our House Designs. The fact that we have standardized the complete heating systems for all our House Designs, puts us in position where we can give you the benefit of every possible saving. The complete heating and plumbing systems are figured and lined up for every house design in this book and we have this standardized to such an extent that we can fill your order and give you shipment within almost two days after we receive it.

Every heating and plumbing proposition that we make for our House Designs are special bargains. If you have decided on any of these house designs in this plan book you can safely say that you will be saving fully from 50% to 60% by purchasing the heating plant or plumbing system from us. Remember, we make you up complete blue-print plans covering every part of the equipment and we cheerfully give you every possible assistance in getting the material installed. We guarantee our apparatus to be of the most modern design and highest grade material and workmanship on the market. Our prices are lower than can be secured in the country.

Do not fail to get this special Heating Catalog. Write for it at once, don't wait. Place your order for your heating plant early and avoid the rush. We have also included in this heating catalog a complete treatise of Instructions on both Plumbing and Heating Systems and the information contained in these pages will explain to you very clearly just how to make every difficult connection, and you will be able to look after the entire installation of your bathroom outfit or heating plant without any trouble whatever.

CHICAGO HOUSE WRECKING CO.
